

Some Effective Methods in Teaching English Language

Kupalova Barno Kamilovna

English teacher of Academic Lyceum of UWED

Abstract

Nowadays, there is a growing interest in the use of interactive methods, innovative technologies, pedagogical technologies in education, one of the reasons for which to date students are taught only ready-made knowledge, and the use of modern technologies requires them to think independently, teaches to search, analyze and draw conclusions.

Keywords: technology, multimedia, pedagogical technology, information technology, foreign language, IELTS, trends.

The main goal of all reforms in the field of education is to bring up spiritually mature people, to improve the education system, to implement the teaching process on the basis of new pedagogical and information technologies in accordance with modern requirements. That is why today in the education system special attention is paid to the effective use of modern computer and information technologies. This means that in the educational process, teachers who teach students in various disciplines to use modern means of information technology, first of all, to increase the level of knowledge and skills in this area, technical support of the education system, full access to the Internet effective result can be achieved only through.

One of the main ways to improve the quality and efficiency of the education system is the use of modern information and communication technologies in the educational process, including multimedia training courses, ensuring interactive interaction between teacher and student, multimedia involvement of highly qualified personnel in the development of training courses and textbooks. We know that today it is difficult to imagine the quality and efficiency of education without modern computer and information technology. The National Program of Personnel Training emphasizes the importance of creating modern educational technologies aimed at solving the problem of mastering the content of education at the stage of development and introduction of a new generation of didactic and information support of the educational process. In particular, the development of methods of integration with science and industry in the educational process, its introduction into practice, the individualization of theoretical and practical training and independent learning, as well as the development of distance learning technology, its tools, mastering, accelerating the teaching of students on the basis of new pedagogical and information technologies and distance learning technologies are among such urgent tasks.

One of the important factors in increasing the effectiveness of education today is the use of technical means. This, in turn, increases interest in language learning and the quality of the lessons taught, making students more active in the learning process.

If the methods are chosen correctly in the learning process, the desired result can be achieved in a short time. The continuous improvement of the education system, the organization of lessons on the basis of pedagogical innovations, the successful implementation of which is one of the urgent tasks facing higher education institutions, are important tasks for professors and teachers

of higher education. Modern technology has witnessed many changes around the world and these changes have improved people's living standards and well-being. Since technology has been applied to various fields, the whole world has become a global arena and people can perform all activities very efficiently in a matter of seconds. True, with the introduction of the latest technological innovations in the field of education, the field of education has also benefited more. In the current generation, there have been dramatic changes in the attitudes and teaching methods of modern students. When learning a language like English, they do not accept traditional methods and approaches to language teaching. But they are very interested in the latest styles, methods and approaches to teaching English. The same situation can be observed when teaching English to second or foreign language learners. Thus, some modern English teachers have understood the situation in a timely manner and they are adopting new technologies in teaching as well as implementing the latest methods and approaches. For English learning to be fun and exciting for students, teachers should always strive to master innovative technologies and stay abreast of current IELTS trends.

Technology has brought a new dimension to education. In this digital age, there is no option for chalk and blackboard, and digital or smart or interactive whiteboards have been installed in their place, so the teacher's workload has been reduced and student concentration has been increased. As a result, there is a positive attitude among students in relying on content, with teachers encouraging them to use a computer, laptop, OHP, mobile phone, tablet, and so on. able to encourage them in a positive way using existing technologies such as. In addition, teachers are using digital texts and real materials in their classrooms to stimulate students' interest in the point of learning.

In recent years, the issue of using modern technologies in the educational process is growing. It is not only new technical means, but also new forms and methods of teaching, a new approach to learning. Our main goal in learning a foreign language using modern technologies is to improve the quality of teaching students in a foreign language, the formation and development of their communicative culture, how to effectively use technology to learn practical skills. 'show. We are in a world where computers dominate the world today. Just as technology plays an important role in business relationships, entertainment, music, movies, and almost every aspect of our daily lives, it also plays an equally important role in education. Studies have shown that 90% of students have access to some type of computer or mobile device at school, at work or at home. Thus, it is not surprising to see that the evolution of classes and teaching methods is being debated in the direction of technology.

In recent years, new, technology-integrated classrooms have become popular in language learning. Mixed education, virtual classrooms, and education management systems are examples of this era of new teaching methodologies that are endorsed by the best educators. These methods include the use of language learning technology to enhance student engagement, facilitate the role of the teacher, and provide a systematic, comprehensive learning experience for all participants. The most inspiring aspect of the technology is its ability to reach an audience all over the world. Involving local teachers in language learning and enrolling students in courses taught by native speakers is what it means to ensure proper immersion. Adopting a language course online opens the door for almost anyone to access this course and its resources.

We know that in the current educational process, the student must be a subject. Focusing on more interactive methods will increase learning effectiveness. One of the most important requirements for English lessons is to teach students to think independently. Today, English teachers use the following innovative methods, based on the experience of United States states and English educators:

- “Creative Problem Solving” is the beginning of the story. students are referred to the judgment of the students;
- Merry Riddles is an important part of teaching English to students, where they learn words they are unfamiliar with and find the answer to a riddle;

- Quick answers help to increase the effectiveness of the lesson; - “Warm-up exercises” use a variety of games in the classroom to engage students in the lesson;
- "Pantomime" is a method that can be used in a lesson where very difficult topics need to be explained, or when students are tired of writing exercises;
- A chain story method helps to develop students' oral skills;
- Acting characters This method can be used in all types of lessons. Professionals such as Interpreter, Translator, Writer, and Poet can participate in the class and talk to students;
- "Thinkers meeting" It is possible to "invite" poets and writers such as W. Shakespeare, A. Navoi, R. Burns. At the same time, using the words of wisdom they say in class will help young people to become perfect human beings;
- The “When pictures speak” method is more convenient and helps to teach English, to develop students' oral speech, it is necessary to use thematic pictures.

In conclusion, the use of innovative methods in English lessons develops students' logical thinking skills, fluency, and the ability to respond quickly and accurately. Such methods stimulate the student's desire for knowledge. The student strives to be well prepared for the lessons. This makes students active participants in the learning process. As the education system sets itself the task of educating a free-thinking, wellrounded, mature person, in the future we will contribute to the further development of effective ways for future teachers to effectively use innovative technologies. possible.

The technology of language learning in educational centers is not the future, but the present education. The use of new technologies in the classroom has been the perfect addition to mastering or mastering a language, and along with technological support, English language courses are the most effective and necessary for students who want to succeed in their studies. Technology is also more useful in training successful teachers. In fact, successful teachers are those who have high levels of interpersonal and interpersonal relationships, and they have a real opportunity to meet children, no matter where they are, and to hear their words sincerely. In addition, successful teachers need to have a deep understanding of the material being taught and its humility, favorite personality and their interactions, and to communicate and respect their students. In addition, successful English teachers need to make the most of existing technologies, use classrooms as well as interesting materials downloaded from the Internet for their students.
