

MARKET ECONOMY AND ITS IN THE COUNTRY HELD PLACE

Abdurahmanov Abdulaziz, Mahmudovich Termez State University, Economics and tourism faculty, Economics education direction II- course student abdulazizabdurahmonov1973@gmail.com

Abstract: It is known in society each one of the system own is important . Market economy this different different to ownership based on economic is a system . This is the system society and state in his life enough important has. This system to freedom based on His basis entrepreneurship organize is enough Market economy about information this in my article briefly statement I did **Key words :** market , economy , state , society , market economy , system , relationship , communication , universal , interest , social communication , private sector, price , demand, supply , consumption , seller , need , commodity , product .

Market himself what This to the question different in the literature differently statements came Short by doing so to speak market these are consumers, buyers and sellers between commodity exchange contact system is considered Market society and state of life indispensable is a fragment. Country in development and population marriage style the market is also improving place incomparable "The market economy" term to all of us familiar Associate Professor, Professor Usman Umarov's " Economy theory " study in the manual - " Market economy, market of relations development based on to the body will come Produce goods release and commodity treatment develop and finally the 20th century to the end Come to the market economy grow up will pass. So , the market economy transition to the 20th century unique global, universal is reality ".

It is known that the market in the economy personal benefit social and the team for the benefit of relatively superior stands Market of the economy a person personal for the benefit of based on to him powerful strength dedicates. It is society development, economic development big impulse " It's done. " information giving passed.

Indeed country development market economy own effect shows . Market of products cost cheap to be, guarantee given of products in the markets sale, directly population of lifestyle to improve take goes. On the market price to the need looking is placed. Market in the economy main role state, private sector performs. The reason they are in the country all various resources and material blessings work release them distributed give, consume to do and mutually to exchange relationship does

Market in the economy work producers, sellers, entrepreneurs between mutually competition important role plays They are in an increasingly competitive market to the law action make, order preservation, development and control increases. Market requirements based on goods work to issue based on is considered Goods and work release terms circle depends even them without each other imagination reached it won't happen. Markets different different in appearances will be They are consumption goods , consumers, tangible, intangible, commoditized, non- commoditized, education, medicine, sports, travel, entertainment, transport, retail, wholesale, labor, resources, finance, valuable

papers, credit, stock exchanges, intellectual property and goods such as from markets consists of It is known that every one a person need through to the market goes, someone education in the field being for example to books and another education to subjects need through special shops, markets they go Based on this, the market appearances is different. Market economy always in action will be The reason time changed as development surface comes, development because of needs will change or more new to things need it is felt. Market international relationships mutually service in connection does. It is economical in collaborations main from places one occupies.

Market types

Local the market is small in the area the market (Termiz, Denov, Angor)

Territorial the market is one how many borderline regions within the market (Medium Asia, Europe) National the market is certain of the country national limit within internal market. (Uzbekistan, Russia)

Interstate the market is two and from him a lot of countries mutually market the world market is this the world countries between sale - sale relations will be the market

Market economy our developed and leading in our country from fields is one Market economy transition period From Uzbekistan basically 3 stages to the period intended. Of them the first is the economy stabilization provide task solution reach, the second stage - of the market infrastructure Create task solution reach, the third in stage es, market to relations complete to pass from providing consists of " information given Ch. Jumayev and O. Roziyevlar the author under publication " Economy theory educational and methodological in the manual.

"The market economy constant mover economic of means one his financial interest is considered Small and private of entrepreneurs economic of interest low or suffocate put their to the activity negative effect is showing emphasizing professor, associate professor Mahmud Gadayshayev edit under " Market balance provide theory " in the book .

Summary

Summary by doing so called " Market economy " countries that's it with one in line people development for, their of need satisfaction for important is considered Quality and useful of products many work release the state develops and that's it with one in line the country the world in the market own the place to find contribution adds it to the world introduces Uzbekistan Republic the first President I. Karimov showing "Market economy transition keep an eye on the problems with a realistic view need Market of the economy only positive side only not but his negative also see the side to know need. To the market, especially his formation stage long and deep economic crises, unemployment growth of money devaluation, many of enterprises fracture and of business maddened to be, of the population supply in terms of sharp classification, right opposite behavior and of crimes growth is typical . of the market this vices to know them ready stand them eliminate reach on the surface right solutions to find to know need ".
