Abstract: In this article, in the course of our research, the problematic study conditions of adolescence in the period of destructive behavior, the relevance of their thoughts and opinions have been scientifically substantiated. Adolescence during destructive behavior appearances psychological diagnosis and correction topic theoretical and practical in terms of current has been problems in the end enters.

Keywords: Adolescence, behavioral, psychological, diagnostic

Teenagers destructive behavior appearances problem according to psychological literature analytical based on adolescence during different extreme to situations relatively very sensitivity note when this to situations relatively inadequate the reaction different social relationships in the process face to come be observed These relations are positive : artistic technical, scientific creative and or something . Negative drinking , drug addiction , addiction own to his soul intention to do like negative behavior appearances example to be take comes. Teenagers by information perception in reaching their peers , video films , commercials and another information channels through received different category to information relatively own in his homeland psychological preventive measures that it has not been transferred in them destructive behavior appearances formation take will come

Man in behavior in society acceptance done me'er and criteria social progress in the process formed _ social progress from the factors to one has become This standard and criteria not only social stability , maybe of the individual himself too spiritual stability and progress for is necessary . In society moral spiritual cultural behavior views formation , this students from the level deviation issues from long ago our alumni by separately attention giving bride Ethical from the standards deviation problems , Abu Nasr Al Farabi's " Bakht achievement the way pointer book " , " Happiness achievement about " , " State of the character wisdom " , " Fazil people like " city " . in his works raised _ Allama own cry in rashes to virtue very big place gives _ To Aristotle like , he too qualities two g' fozoil to the part speech [to reason bone lang virtues] and fazail behavior [behavior virtues _ _ taste and their the middle features emphasizing passes . Great of our countryman in his opinion , to a person him beautiful deeds to do for which directs custom product to be mature behavior it is necessary Your behavior goodness in behavior me'er where level saved with is connected . Another one east scholar Abu Rayhan Beruni own in his works people and of nations positive bro negative traditions , behavior in formation natural of the environment and geographical of factors importance showing gave _ of Ibn Sina moral views mainly « Ethics to science circle pamphlet " , " Duty about brochure " , " Lust pure catch about pamphlet " , " Justice about wear tob " , " Stands in places such as events in his works and own contemporaries with take went in discussions own on the contrary found Yusuf Khos Hajib by a person behavior character relatively to himself special It's good to talk behavior yes , yes behavior also , to be of two types can : innate and social environment as a result formed behavior

_ Yusuf Khos Hajib moral and philosophical views today's in the day too own value has not lost , because it is universal, spiritual the basics teaches . Allama's to their training relied on without we too yes generation so in the spirit our upbringing it is necessary After all, in society ethics manners if it disappears in society spiritual in terms of poor people mass to the body will come China philosopher Sunzak and ancient Greek philosopher Plato in man an incitement to mischief features is available the fact that those who emphasized In man destructive behavior nature for now in psychology _ yes good not studied from problems one is counted This problem of the 20th century in the middle formed .

Destructive behavior not only in man known one social problems, maybe his physical in health too problems come to exit reason to be can _ Destructive behavior 2 is basic in types example will be

1. Delinquent type - in society acceptance done social legal to the teachers gram against has been behavior - actions your behavior the fact that it is used [household family disputes, traffic accidents , rudeness ...]

2. Deviant type - in society acceptance done moral to the teachers opposite _ _ behavior see nsh example reach [alcoholism , suicidal drug addiction...] kindness to love have that it was not .

Destructive your behavior all in appearances Ineson's known one protection reactions as surface but in the nervous system disorders with depends to be possible. Destructive behavior in childhood negative emotional good luck, dad mother's to the child relatively emotional coldness as a result necessary at times of them enough level kindness to love have non-existence , generational factors to be too can _

From this except the following reasons too separately attention demand does :

- Mental health condition what? during instigator factors under the influence of changed standing possible
- Physical health condition Hate during sharp to believe possible as a result a person never how the law to the rules to obey unwillingly remains
- Professional in the field failures This in cases a person his own inaccuracy , placed to students answer give that he can't nice is enough As a result own to himself thank you to give level decreases , social position loses to himself reported objections unfair that acceptance does _
- Household material problems _
- Alcohol or narcotics _ consumption to do

Z. Freud is human 2 main instincts for behavior : Eros - love istinkti in it power [[«libido»] khaètni save , re redirects to recovery and Thanatos is death instinct , in it power khaètni destroyed to do and to stop directs [suicide] Thanatos Freud is the basis of all biological what? pharmacies for common has been biological mechanism _ is enough considered each an organism in itself nervous excitability possibility until to decrease movement does death all internal excitability in general loses , therefore for all alive organisms to death they strive But of the organism absolute to peace aspiration what? instinct resistance shows according to Freud a person behavior this two of instinct mutually relations as a result is formed Destructive behavior all people for characteristic 2 some in humans this behavior so much strong that wake up in society place and behavior defines according to Freud in man destruct to power relatively careless being won't be If Tnatos capacity out if not redirected of the individual himself perish to do possible Destructive the floor destroyed doer characters with depends non- catharsis - expressive movements excitement to do can _

Freud's teaching famous psychologist and psychotherapist E. Bern support powers up . But this researchers only destructive behavior appearances deep analysis did not aunt destructive trends they emphasize .

E.V. Zmanovskaya 3 types behavioral deviations brings : antisocial (delinquent), asocialnoe (amoral) , autodestructive (self destroyed doer) .

Sidorov N.R. deviant behavior sifvtidv of the individual interpersonal relationships regularly to break directed — stable destructive behavior _ appearance that evaluates Teenagers criminality learned psychologist A.I. Dolgova It is said that it is a violation from doing first a teenager behavior in the form of from me'er sharp withdrawals being passes . The author deviant mannered teenagers for special There are 2 categories normative withdrawals separate shown by:

forced violently and selfishly category teenagers himself strong , responsive , peers to help ok by doing wants to show will be But such category of teenagers truth about conclusion criminal is the conclusion . In their character selfishness , cruelty , physicality to power believe , unconventional groups to laugh like elements is priority .

Autodestructive medical and psychological from Meer aside outgoing person integrity and development threat doer behavior appearances enters : suicidal behavior, food dependence, pharmacological to substances relatively dependence , fanatical dependence, khaèt for dangerous has been to the activity aspiration (sprotning extremal types) .

Destructive behavior problem with famous America oimi E Fromm engaged in From his " Freedom escape " , " Man destructiveness anatomy » in his works this of the problem social cultural determinants separately attention directed _

Polish psychologist Yu. Kozeletsky according to each one "transgression" to a person is a person's now have has been indicators to the results unsatisfied _ more more to the results have to be aspiration organize does _ Yu. Kozeletsky constructive, creative transgression - creativity and destructive previous ones to lose directed transgression differentiates

by D. I. Feldstein according to deviant teenagers social slow , aggressive , curious , rude , " eye èsh » to spill inclined many of them cheater , irresponsibility with separate stands _ of I.A. Semikasheva research according to such group participants to the father similar to traits have is separate _ people not himself _ belongs to the group respect does.
