**Аннотация:** The Lower Amudarya tributaries were completely dependent on the Khanate of Khiva until 1873. However, after Tsarist Russia conquered these lands, the Amudarya division belonging to Tsarist Russia was established on the south bank of Amudarya. The administrative system of the Amudarya division was under the control of military officials. Russian courts were used for the European population of the region, and traditional courts were used for the local population as before. This article talks about the role of the cadies' court in solving economic and political-social problems in the judges' court of Chimbay section of the Amudarya division. In the scientific work, archival materials that were not previously included in the scientific treatment were used.

**Abstract :** This in the article electricity resources use according to one series useful Suggestions and principles given , this factors through state control efficiency increase in the field comfortable tactics and practices if applicable beneficial will be said on purpose some questions are also given . Electric from energy reasonable use the wealth of the people , society high from conditions innumerable use for road opens .

**Key words :** electricity , resource , energy , factor , economy , joint enterprises , state control .

**Ключевые слова :** электроэнергия , ресурс , энергетика , фактор , экономика , совместные предприятия , государственный контроль .

Fuel i-energy resources illegal use cases eliminate reach and prevention get , from them efficient and reasonable use through economy networks and social of the field energy efficiency increase , consumers by electricity energy and natural from gas use to the rules compliance to be done over control strengthen in order to :

1. The following :

Uzbekistan Republic President of December 21, 2022 " New Uzbekistan administrative reforms done increase measures to [Decree](#) No. PF-269 according to Energy Ministry in the presence of Electric energy , oil products and from gas to use control to do inspection ( next in places - O'zenergoinspeksiya ) is organized done ;

Uzbekistan Republic President's decree of January 25, 2023 "Republic of execution doer power organs activities efficient to the road to put circle the first next organizational measures to [Decree No.](#) PF-14 [HYPERLINK "https://lex.uz/docs/-6369997"](https://lex.uz/docs/-6369997) according to Self-energoinspection State budget at the expense of funded total management state units the number

is 357, that's it including Self-inspection chief of deputies the number is 2 people reached fixed information for acceptance let it be done

2. The following O' zenergoinspection of activity priority directions reached set :

- legal and physical persons by ( from the population except ) fuel i-energy resources work extraction ( mining release ), re work , transfer ( transportation ), distribution and consumption make , their quality and amount in terms of to be kept provide in the field legislation documents and technical in terms of in order put according to normative documents requirements compliance to be done over state control done increase \_

- electricity , gas transmission and gas distribution networks illegal connection , fuel and energy looting of resources to do and illegal consumption of doing another cases as well as them happen to do possibility giver reason and conditions identify , eliminate reach and prevention get \_

- directly consumers by used and belongs to regions at the border to networks delivered given fuel and energy resources volume between differences determination and eliminate reach \_

- legal and physical persons by ( from the population except ) energy in objects unhappy events and technological breakdowns ( accidents ) . prevention get measures work output and his execution over control done increase \_

- again recoverable energy sources devices and energy efficient and energy thrifty modern technologies current do as well as energy resources consumption to do efficiency monitoring take to go

3. Let it be noted that :

state authority and management bodies , law protection doer and control doer organs by O' zenergoinspection employees undertake their authority not included of duties loading is prohibited;

state bodies , that's it including the right protection doer and control doer organs this to the decision according to O' zenergoinspection his undertake loaded task and functions comprehensive in performance help condition ;

O' zenergoinspection undertake loaded tasks perform for necessary has been information , documents and another materials his legal on demand according to free of charge present is done;

O' zenergoinspection by fuel-energy resources in vain spending , of them illegal and ineffective use cases determination about state control done increase with depends control events economy host subjects activities check does not count ;

O' zenergoinspection employees service certificates has been in case of , of day desired on time of consumers fuel-energy resources account get equipment indicators writing get and their status , connection schemes and devices out of sight transfer for account get equipment , schemes and devices unimpeded go to see right \_

O' zenergoinspection Uzbekistan Republic President and Ministers Court decisions based on state organs and organizations by again recoverable energy of sources devices installation control does and defined of indicators execution not provided in the case of their official to individuals relatively measures to see according to Ministers To the court Suggestions by entering goes \_

4. Prosecutor General fuel and energy resources use in the field to legislation compliance to be done and his performance over control done to increase in charge has been deputy ( next in places - Prosecutor General deputy ) position let it be entered .

Let it be noted that the Prosecutor General deputy leader :

O' zenergoinspection undertake loaded task and functions to perform practical help shows ;

Prosecutor General's Office in the presence of Mandatory execution bureau and Economical to crimes against to fight department activities coordinates .

Prosecutor General's Office two week in term fuel and energy resources use over state control efficient organize reach according to suggestions Uzbekistan Republic President to the administration let him enter

O' zenergoinspection and his territorial departments activities this decision with defined priority directions based on more improvement according to complex measures efficient done increase responsibility personally energy Minister JT Mirzamahmudov and the Attorney General deputy undertake let it load .

5. Fuel i-energy resources reasonable and efficient to use provide and this about processes digitization in order to :

a) exists electricity and gas networks and of devices download defined from the norm increased in case , to them new consumers connect definitely be prohibited ;

from March 1, 2023 :

control events done in raising differences determination in order to To Zenergoinspection " Territorial electricity networks " JSC, " Hududgaztaminot " JSC, " Uzbekistan national electricity networks " JSC, " Uztransgaz " JSC electricity energy and natural the gas control to do and account to get automated in systems fuel-energy resources consumption about data monitoring \_ opportunity let it be created ;

electricity energy and natural from gas use the rules break with dependent \_ offense according to Created documents electron in the form clearance and belongs to data "E- administrative to the "work " system input order current let it be

from July 1, 2023 legal persons and alone in order entrepreneurs with electricity energy and natural the gas delivered to give according to contracts electricity and gas supply of enterprises software supply or " Transparent construction " national information system through electron digital from the signature used without structure let it be marked .

In this :

this order legal persons and alone in order entrepreneurs for fuel and energy resources consumption according to limits designation and to them changes also applies to input is done ;

state customers with Created contracts about \_ data state purchases according to special information to the portal automatic respectively to be sent provided ;

budget customers with Created contracts Treasury \_ in divisions electron in form ( human without factor ) from the list will be held ;

until October 1, 2023 there is electricity energy and natural the gas transmission and distribution networks and devices download increased of leaving prevention get opportunity Create in order to they are geoinformation to the system be entered and electricity and gas supply of enterprises software supply and " Transparent construction " national information system with integration let it be done

In this case , electricity energy and natural the gas transmission and distribution networks and devices this systems with integration from being done after \_ electricity and gas networks in connection connection points automated way a person without a factor is selected ;

from October 1, 2023 electricity and gas networks and devices in construction project documents competent organs with agreement respectively electricity and gas supply of enterprises software supplies through sure in deadlines done increase let it be marked .

Energy Ministry Digital technologies Ministry , " Territorial electricity Networks " JSC, " UzGasTrade " JSC, " Khududgaztaminot " JSC together electricity and gas supply of enterprises

software supplies work output and to work lowering and this in clause mean caught technical of events own \_ on time and good quality done increase provide .

6. O' zenergoinspection " Territorial electricity networks " JSC, " Hududgaztaminot " JSC, " Uzbekistan national electricity networks " JSC, with " Uztransgaz " JSC together :

a) constant respectively :

legal and physical to individuals belongs to energy objects ( next in places - a list of objects ) . forming let's go

in objects consumption being done fuel and energy resources size identify let's go

in objects fuel and energy resources in vain spending and quality requirements compliance not to cases identify let's go and they are according to own powers within measures let him see systematic basically fuel and energy resources illegal use of cases prevention get according to practical measures done increase ;

of objects to networks right \_ connected and counters their existence \_ technical requirements and to standards compatibility checking Let 's go , also guilty has been this objects employees and to them service showed individuals in legislation defined in order to responsibility weight measures let him see

in objects installed \_ of counters electricity energy and natural the gas control to do and account to get automated to systems suitability let him learn

b) every month electricity and gas networks and of devices downloads and setting checking went and found out shortcomings eliminate reach measures let him see .

In this , O' zenergoinspektion every month Prosecutor General deputy and energy to the minister this in clause mean caught measures performance on the surface report by entering let's go

7. General Prosecutor's Office High Court , State safety service , Domestic affairs Ministry of Energy Ministry with together one week in term the following mean holder the law the project defined in order enter :

electricity energy , gas and from the water supply use the rules break through robbery \_ to do cases theft \_ crime as set ;

O' zenergoinspection electricity energy and from gas use the rules break with depends administrative offenses about things seeing exit ( official to individuals relative to ) authority set ;

O' zenergoinspection by given written instruction and submissions failure to perform for administrative responsibility mark \_

8. Energy Ministry and the Prosecutor General 's Office the following funds \_ Self-energyinspection defined in order openable special treasury to the account orientation about to the proposal consent be given :

O' zenergoinspection in the presence of fuel-energy resources illegal use with depends violations according to levied harm 25 percent of the amount ;

consumers by power of the coefficient normative value holding not standing as a result surface came electricity of energy additional \_ the loss of with depends from fees " Territorial electricity networks " to branches of JSC fell 50 percent of funds ;

O' zenergoinspection by applied administrative fines and economic sanctions according to levied 50 percent of funds ;

O' zenergoinspection by paid services from showing falling funds ;

in legislation not prohibited another sources .

In this case , special treasure \_ in the account funds the following purposes use mean let it be :

O' zenergoinspection employees material encourage and material and technology base strengthening ;

O' zenergoinspection employees preparation , re preparation and their qualification increase \_

O' zenergoinspection contract based on an expert and experts his undertake loaded tasks efficient perform for attraction to do In this case , the contract based on attraction to be done an expert and specialists status according to Self-inspection to employees equalized ;

O' zenergoinspection duties efficient done increase and information technologies current reach and modernization to do

9. Energy ministry :

a) Digital technologies Ministry with together by the end of 2024 until electricity of energy dispatch management and information hard work software -hardware complex (SCADA), as well as development from release starting from final to the consumer delivered until giving has been all to processes electricity energy and natural the gas control to do and account to get automated systems (ENHOAT, GNHOAT) are complete current to be done provide .

Prosecutor General's Office this systems complete \_ current to be done separately to control take it ;

b) " Territorial electricity networks " JSC and " Hududgaztaminot " JSC together within a month electricity and gas networks connection for technical conditions requirements and them to give order international standards based on again save \_ exit and designation according to Government decision the project Ministers To the court let him enter

10. " Uztransgaz " JSC , " Territorial electricity networks ” JSC and “ Hududgaztaminot ” JSC Tax committee with together until June 1, 2023 fuel-energy resources illegal and ineffective use cases determined in the case of a person without a factor again calculation make , delivered harm the amount determination and Tax committee in parallel at the base account to receive mean holder software supply work come out and to practice current let it

" Uztransgaz " JSC, " Territorial electricity networks ” JSC, “ Hududgaztaminot ” JSC, “ UzGazTrade ” JSC, “ Issyklik electricity stations " JSC, " Uzbekistan national electricity branches " JSC, " Uzbekneftgaz " JSC, " Uzbekhydroenergo " JSC software supply work on the way out consumers base formation and billing systems with integration provide "UZINFOCOM " state information systems Create and support to the only integrator" LLC all primary information present let him and billing systems with to contact permission let it be given

11. Construction and housing and communal services farm \_ Ministry Energy Ministry with together until June 1, 2023 :

building and structures and of them use types according to alternative energy , natural gas , electricity energy , irrigation , drinking water and waste waters spend standard volumes strictly defines criteria to the system current let him do it ;

of objects external engineering and communication networks connection technical conditions digitized without " Transparent construction ” national information system through done increase

12. Energy Ministry energy networks are available \_ of networks current status and periodic downloads digitized without their “ Transparent construction ” national information to the system integration provide and every month data base updated let's go

13. Energy inspection until May 1, 2023 fuel-energy resources illegal and ineffective use cases determination and them online clearance for all employees special tablets with provide .

14. Energy Ministry of the General Prosecutor's Office with together within a month electricity energy and natural from gas use the rules critical again see \_ out and updated the rules confirmation for Ministers To the court offer let him enter

15. Ministers Court within a month O' zenergoinspection about the charter confirm .
16. Energy Ministry interested ministry and offices with together in two months to legislation this from the decision come coming out change \_ and additions about Ministers To the court Suggestions let him enter
