Abstract: A number of works are being carried out in Samarkand and Bukhara regions along with the republic's regions. One of the most visible branches of the social sphere is health care, and in this regard, Samarkand and Bukhara regions are cooperating with a number of foreign countries.

Keywords: Samarkand, Bukhara, region, foreign countries, diseases, Germany, South Korea, Russia, Serbia, Czech Republic, Minsk.

Introduction

In the first years of independence, there are four important factors in the socio-economic development of our country: demographic trends; sustainable development of social infrastructure; increase in the level of population employment; A number of works are being carried out in Samarkand and Bukhara regions in order to ensure strong social protection of its needy and underprivileged strata. One of the most visible branches of the social sphere is health care, and in this regard, Samarkand and Bukhara regions are cooperating with a number of foreign countries.

In particular, on the basis of the "Health-3" project implemented with the financial support of the World Bank, the provision of medical institutions of Samarkand region with modern diagnostic tools and qualified specialists is the basis for raising the quality of the ongoing treatment and prevention work to a higher level. For example, in 2013, on the basis of the foreign investment program, large-scale reconstruction and capital repair work was carried out in 7 regional medical associations, the Samarkand city hospital of infectious diseases and the clinic of the Samarkand Medical Institute. 24 billion 849.6 million soums were allocated for the realization of these goals. According to this program, the Poyarik district medical association of the province was also transformed into one of the new healing centers. Thanks to the construction works, the building of the institution has acquired a modern look, and it is possible to provide qualified medical services to the population.

Discussion

During the nine months of 2014, more than 6 billion 200 million soums worth of medical equipment was delivered to the territory of Samarkand region. As part of the "Year of a Healthy Child" State program, 26.9 million construction and assembly works were carried out in 12 treatment and prevention institutions, and modern digital X-ray equipment was installed in eight district medical associations. Thanks to the work carried out on the basis of this state program, it became possible to provide high-quality medical services to the residents of the region.

In July 2015, a medical examination was conducted in the multidisciplinary children's medical center of the region in cooperation with the international charitable foundation "For a

healthy generation" and the experts of the German international organization "Freundenzdorf International". Children from low-income families in the region with upper lip and hard palate, congenital defects in legs, orthopedic diseases related to neck curvature, and burn injuries were examined by German doctors.

Results

In October 2016, a delegation from In Ha University Hospital of South Korea visited the region. "Mutual relations between Inkha University and the Foundation were established in 2011," says Rahima Rahmonova, Head of the International Charitable Foundation "For a Healthy Generation". During the cooperation, children suffering from congenital heart defects, complications of skin burns, congenital hand-foot joints and other diagnoses were treated free of charge in Korea. Such medical examinations were carried out by Korean specialists in 2015-2016. Foreign relations are progressing from year to year, study of the experience of foreign countries in the field of health care and wide application in practice, not only Samarkand region, but also in Bukhara region in this regard, a number of works have been carried out in the field of health care: On April 22, 2017, the head of the Department of Plastic Surgery of the Sechenov Moscow Medical Academy of the Russian Federation, Ph.D. I.V. Reshetov visited the Bukhara Regional Oncology Center, got acquainted with the activities of the Bukhara Regional Oncology Center, and gave his advice. Bukhara regional oncology center, based on the established plan of improving the qualifications of employees in Russian and foreign clinics and calling experts from advanced foreign clinics, has been constantly interacting with foreign countries based on the plan. An international memorandum was signed between the Bukhara Regional Oncology Center and the Russian Oncology Scientific Center named after Nikolay Nikolaevich Blokhin of the Russian Federation. In addition, an international memorandum was signed between the Serbian Oncology Research Institute and the International Federation of Surgical Oncologists and RIO and RIATM. The Bukhara Regional Oncology Center is working with advanced foreign clinics to train advanced personnel in the field of oncology, as well as training young specialists in advanced foreign clinics.

In December 2017, visiting specialists from the Czech Republic installed "Terabalt" gamma therapeutic equipment and conducted training for medical specialists of the center. The equipment has been put into operation since January 2018. Since January 2018, 3 specialists of the center, who have improved their skills in Minsk (Belarus) under the IAEA (Mejdunarodnoe agentstvo po atomnoy energii) project, have been treating patients with the newly installed distance telegammatherapeutic equipment. started, with the help of this equipment, the residents of the local and neighboring regions (Khorazm, Navoi and Kashkadaryo) are happily serving patients suffering from oncological diseases.

Conclusion

To summarize, in 2013-2018, in the Samarkand and Bukhara regions, many foreign countries have cooperated with many foreign countries in the field of health care and have been demonstrating the knowledge and skills gained through the exchange of experience as a result of mutual foreign relations.
