

Essential Aspects of Working With Young People

Iroda Ablakulova

Jizzakh Regional Department of Justice

chief adviser on legal information

ablakulovairoda361@gmail.com

There are more than 19 million young people under the age of 30 in our country, or 55% of the population. While 600,000 young people enter the labor market every year, this number will reach 1 million in the next 10 years. Therefore, special attention is paid to providing quality education, vocational training and employment to young people. A vertical management system was created for the organization of these works in the neighborhood, and selfless and enterprising youth leaders were appointed to 9,500 neighborhoods. Through this system, more than 100 opportunities were created for young people, and targeted support was launched. Our honorable president pays so much attention to the issue of youth that the main goal of every reform implemented in our country is closely related to creating good conditions and opportunities for the young generation and realizing their dreams and hopes. It is our word that 4 million young people are being attached to the law enforcement and defense bodies on a republican scale and a system of adopting them is being created based on the tasks set by the extended meeting of the Security Council held by the President of the Republic of Uzbekistan Sh. Mirziyoyev on January 12 of this year. . On the basis of this experience, they are outsourcing work to law enforcement and defense agencies and their sub-units, divided into 4 sectors. Judiciary bodies and the National Guard, as the 4th sector, focused their activities on the direction of targeted measures with young people. A total of 12,111 young people from 34 neighborhoods are attached to the Jizzakh regional justice system, and a system of direct work with them has been established. Meetings and roundtable discussions are held on the areas divided into categories, they get to know the young people closely, their problems are studied and solutions are found. This system is a bright example of the practical work being done to ensure that no one is indifferent to their fate, life and future. To date, the district and city justice departments have held 223 promotional activities in local areas, involving about 8,000 young people. At the same time, door-to-door interviews are being organized with young people and their parents. As a result of studies, 175 problems of young people were identified and 34 problems were solved positively. Special attention is also paid to the system of working with students studying in higher education institutions during promotional activities. There are 5 higher educational institutions in our region, and it was found that 3,578 young people attached to the judicial bodies are studying in these educational institutions. He met with 450 young people currently studying at Jizzakh Pedagogical University.

In addition, within the framework of the "Legal Information Days" project, law classes were held in 28 secondary schools, and during these classes, young people were interested in the field of law, raising their level of awareness of newly adopted legal documents, and forming feelings of patriotism and loyalty to the country. , through which special attention is being paid to areas such

as increasing the mood of intolerance against vices such as corruption and fraud. One more thing can be recognized that by widely promoting reading among young people and families in our country, increasing their interest in reading books, introducing reading culture in them, national pride, pride, love for the Motherland and Wide-scale practical work is being carried out to further develop the relevance. Employees of the justice system of the Jizzakh region took part in the campaign "Give a book" organized by the initiative of the Ministry of Justice. More than 300 books of different genres donated as a gift for the library were presented to the library established in "Faizabad" neighborhood of Bakhmal district. Similar noble initiatives were implemented in 7 other districts.
