Abstract. *This article talks about the methodology of foreign language teaching, the history of its development as a science, the types of modern methods used in the methodology of foreign language teaching and their use. In addition, the training of specialists who can perfectly learn foreign languages and can speak fluently in the foreign language they are learning, the training of personnel who meet the requirements of entering into the culture of the peoples of the world by learning foreign languages is the goal of the educational reform in our country and one of the tasks.*
Key words: *methodology, innovation, foreign language, communication, skills, competence, didactics, intercultural communication.*

Introduction

Most people in today's rapidly developing world can speak two or more languages. In terms of languages, some languages are relatively easy to learn, some are more difficult to learn, and this requires some time and effort from people. But I also think that any language can be learned with a little passion and effort. From today's point of view, as a result of the reforms in the study of foreign languages, the young generation who are entering language learning, from pre-school education to higher education, learn by comparing their mother tongue and a foreign language at the same time. learns It is in linguistics that this method is one of the best ways to achieve a positive and effective result in accelerating students' learning. Because the student who is learning a language has studied his mother tongue in depth, this thing is much more useful, and if he learns a comparison of his mother tongue and a foreign language at the same time, this has been tested over the years and is an effective method, and learning foreign languages through current modern technologies is one of the most effective and convenient methods. This method is one of the most popular language learning methods for people of all ages.

ANALYSIS OF LITERATURE ON THE SUBJECT

Also, from the point of view of attention to language learning in our country, unprecedented things have been done in the last 5-10 years, and they have brought it to the level of politics and replaced it with foreign languages. a number of decisions and decrees on learning have been developed, in particular, under the chairmanship of our president Shavkat Mirziyoyev, a video conference dedicated to improving the system of learning foreign languages was held. it was emphasized about the introduction. Now, instead of continuous traditional teaching methods, it is possible to organize lesson processes based on interactive methods using new ICT. In turn, this is one of the modern methods of learning a foreign language in the developing world. Learning and teaching any foreign language using modern technologies is one of the most effective ways.

- You can watch and listen to foreign language video clips, shows, dialogues, movies or cartoons through computer, phone, tablet, audio.
- Audio programs in English or other languages can be heard and watched.
 - Modern and traditional players can use tape recorders.
 - Can be used for listening to CD players. The use of such technical tools helps learners to learn a foreign language more interestingly and effectively. Educational technology is the efficient and effective use of modern technical tools in the educational process.

RESEARCH METHODOLOGY

According to psychologists, the psychological mechanisms of playful activity rely on the fundamental needs of a person to express himself, find a stable place in life, self-control, and realize his potential. Any game should be based on generally accepted educational principles and tactics. Educational games should be based on educational subjects. In the process of games, the student is more interested in this activity than in a regular lesson and works freely. It should be noted that the game is, first of all, a method of teaching. Pupils participate in game lessons with interest, strive to win, the teacher also provides education to the pupil through them. The student believes that he can speak, listen, understand, and write while playing English games, and is interested.

ANALYSIS AND RESULTS

One of the most important requirements of English language classes is to teach students to think independently. Today, English language teachers are using the following innovative methods, relying on the experience of pedagogues from the USA and England:
 - "Creative Problem Solving" to use this method, the beginning of the story is read to the students, how will it end, refers to student judgment;
 - "Merry Riddles" teaching riddles to students is important in teaching English, they learn unfamiliar words and find answers to riddles; - "Quick answers" helps to improve the efficiency of the lesson;
 "Chigil yazdi" ("Warm-up exercises") using various games in the classroom to interest students in the lesson;

CONCLUSIONS AND SUGGESTIONS

Learning a foreign language is a multifaceted discipline, in which a person undergoes complex psychological changes. In particular, the process of comparing the native language with a foreign language occurs. Various teaching methods and technologies are used in this process. With the help of modern pedagogical technologies, teaching by comparing the foreign language with the mother tongue gives an effective result. Teaching a foreign language requires knowledge of its methodology. Methodology and technologies are important in the process of learning a foreign language. There are various methods of teaching methodology. The widely used methods in foreign language teaching methodology are: communicative didactic method, intercultural dialogue organization method and exercise organization method. All three methods are closely related and complement each other. Since the science of methodology is related to the science of didactics, it is based on communicativeness during foreign language learning and the method of communicative didactics is created.
