Enter. First published in 1922, Catherine Mansfield's short story "The Garden Party" is one of the famous examples of modernist literature. The story focuses on themes related to class consciousness, social ethics, and the transitory nature of life. It depicts the wealthy Sheridan family preparing for a lavish garden party.

The story's brief plot follows Laura, the young daughter of the Sheridan family, as she helps prepare for the garden party. While the preparations are underway, Laura meets a worker living in a nearby cottage who is unhappy. She hears that her husband has died in an accident. She believes that the party should be canceled out of respect for the deceased, but her concerns are dismissed by her family. Despite her initial discomfort, Laura becomes enthralled by the party. After the event, Laura's mother gives her leftovers to take to her grieving family. She gives her basket. When Laura visits the cottage and sees the body of a dead man, she is struck by the profound silence and peace of death. The story shows how Laura expresses her feelings in an unknown situation, and this feeling ends when she returns home.

The themes of the story can be grouped as follows:

1. Class distinction. The story highlights the social divide between the wealthy Sheridans and the working-class families living nearby. The Sheridans' casual denial of the death of a working-class man reflects their privileged position and lack of empathy for those outside their social circle.
2. Life ephemeral nature. The contrast between the lively garden night and the deathly silence reminds us of the transient nature of life.
3. Innocence and Experience: Laura's visit to the deceased's house in the story can be seen as a coming-of-age moment in which she confronts the harsh realities of life and death.
4. Style and Structure Mansfield's story is notable for its subtlety and free use of indirect speech, which allows readers to see the world through Laura's eyes. The story is notable for its vivid imagery and attention to emotional detail, especially in its depiction of the garden and banquet setting.

The Garden Feast is often regarded as one of Mansfield's finest works. It demonstrates her mastery of the complexity of human experience in a simple narrative. In Katherine Mansfield's *The Garden Party*, the garden is described in rich and vivid detail, emphasizing its beauty and the sense of luxury that surrounds the Sheridan family. The garden is central to the story, representing both the family's wealth and the idealized, sheltered world in which they live. The story uses the following as a basis for describing the Garden:

1. The path and the vibrant scenery. The garden is described as full of vibrant colors. The lawn is described as "an ideal place for a garden party," and the flowers, especially roses, are abundant and perfectly grown. Roses are called "the best roses in the world," emphasizing their beauty and the care taken to maintain them.
2. Sunlight and Atmosphere. The garden is bathed in sunlight, creating a warm and inviting atmosphere. The sun is described as "slanting" and "falling" into the garden. . This gives it an idyllic and almost dreamlike quality.
3. A sense of order and perfection. Everything in the garden is in its place, neatly organized. This reflects the Sheridan family's desire to maintain control and order in their lives, as well as their social status.
4. Exotic plants. The presence of "lilies" and "cannas" that are not native to the area suggests a sense of exoticism and luxury. These plants contribute to the idea of the garden as a space of wealth and privilege, separate from the everyday world.
5. Marquee. A marquee, or large tent, is set up on the lawn for the garden party. It is described as a "wonderful cream marquee" that looks like "a slice of wedding cake." This comparison adds to the festive, party-like atmosphere of the garden, while also hinting at the superficiality of the event.

The symbolism of the garden is also particularly significant in the story. For example, the garden in *The Garden Party* represents the Sheridans' sheltered, privileged world. It is a place of beauty and elegance, but at the same time, it is cut off from the harsher realities of life, such as death and poverty. The contrast between the idyllic garden and the nearby cottages, where working-class families live, highlights the story's theme of class division. The garden also represents Laura's innocence and her early naivety. As she moves from the garden to the deceased's summer house, she is transformed and confronted with the complexities and inequalities of the world outside her sheltered environment.
