**Key words:** *behavior verbs, semantic analysis, Uzbek language, explanatory dictionaries, social behavior, mental cases, verb meaning, linguistics, psycholinguistics, cultural context.*

### **Introduction**

Uzbek language, other languages like, people spiritual and social status representative many to verbs has. Behavior verbs, own in turn, humanity internal and external movements in describing, its others with mutual their connections and emotional circumstances reflection Uzbek of the language explanatory in dictionaries behavior verbs his/her own semantic wealth and many connotations have. To them given meaning and their application circle people various in cases how expressed to understand help gives. This point of view from the point of view, Uzbek of the language explanatory dictionaries through behavior verbs meaning and content analysis will be done, as well as to them of scientists scientific approaches and their application about word goes.

**Material and method.** In the article main source as **Uzbek of the language explanatory dictionaries** used is, this dictionary in linguistics and semantics in the field wide confession done is a work. In the article used methodological from approaches one is **descriptive research method** through it behavior verbs semantic analysis, their mutual connections and application studied. Such approach main task behavior verbs every one of contextual and spiritual their rise, as well as their in linguistics how importance has that open is to give.

In the study **linguistic and semantic analysis** methods used is, this of verbs meaning formation and social cultural in context instead to determine opportunity gave. This with together, other of scientists thoughts add and from them use through, behavior verbs semantic to oneself characteristics about deeper to knowledge has We are.

**Results.** Uzbek in the language behavior verbs, own to the meaning looking at one how many to the group is separated. Every one in the group of verbs meaning and content, context depending on the difference does.

## 1. Emotional the situation representative verbs

Uzbek in the language behavior verbs between person's internal state, feelings reflection provider verbs many This type of verbs often positive or negative emotions in expression is used. This with together, their social and cultural in context to oneself The originality is also different. stands.

For example, **to be angry** verb usually person's negative feeling with related is, its internal anger or dissatisfied to be This verb often negative feelings represents and people external to the environment their answers reflection Example : "He got angry and *threw* himself lost.

To be angry is very angry came out in case to be. *Example* : Sergey is angry, upset, excited. the word saying, from the pulpit When you get off, women peep-peep crying saw ( HG'ulam ). *Example* : Governor this the word hearing that angry, his face suddenly twisted, gasket glasses nose over fall went (M. Ismaili ).

Another one example as, **happy to be** verb to be brought can. This verb positive spiritual state, happiness represents. Verb often good news or unexpected joy indicates.

*Example* : "He/She is new." happy to hear it has been. "

## 2. Social behavior representative verbs

Social behavior representative verbs people in society relationships, mutual their relationship represents. Uzbek of the language explanatory in dictionaries such verbs many in society daily relationships, communication and cooperation in expression used. **See** verb social communication indicates and people between face to face of communication to the installation hint does.

*Example* : " They see you later " They talked. "

Also, **help to give** verb help and support It means social. of connections important from the elements one is considered, because people mutual for help was need many linguists by in linguistics and in psychology research made.

*Example* : "He helped to give movement did. "

## 3. Practical behavior representative verbs

This type verbs often people various practical their activities, their work represents. **Work** verb person's activity, work This verb means many linguists by Uzbek of the language practical aspects explanatory important term as is considered.

*Example* : "It is complete. " and effective to work movement did. "

## 4. Behavior and behavior representative verbs

This type Verbs are usually human. general behavior, social activity representative are verbs. For example, **humility to do** verb person's modest behavior means, this and in society important from values one as is seen.

*Example* : "He is different." with humility " He spoke ( modestly ). "

**Problem and discussion.** Uzbek in the language behavior verbs some, in society and in culture difference to do possible. Such differences, language to oneself typical social and cultural layers, as well as behavior verbs semantic to changes related. For example, **to get angry** verb some in the regions too much outside hard expression as consideration possible, in others and this negative or angry the situation unclear in a way description possible.

This with together, behavior verbs mutual relationships, social and cultural to the context looking at change possible. These linguists by scientific in approaches emphasized. Behavior verbs semantic analysis through, this of verbs various in teams and social in groups how differentiation shown.

**Conclusion.** Behavior verbs Uzbek of the language semantic in the system separately place holds and they in society people spiritual status, social their connections and practical activities reflection Uzbek of the language explanatory in dictionaries cited behavior verbs, their semantic meanings, meaning

changes and application circle about complete imagination creates. Such analysis, linguistics and cultural studies in the fields new research for important basis become service does.
